you Mr. Stewart-Deadham's  
delightful letter, return plus  
one you write.

How encouraging this  
request from Africa  
is. As I may keep it  
I shall send it to Mr.  
Allen. (Ed. of Teachers' World).  
Mrs. Penruddock is to  
address a meeting at  
Winchester. 200 to be expected.  
This again is thanks to God.

but the greatest joy & encouragement - has come  
from the Glos: schools.

The British went very  
fully & deliberately to  
your meeting of the y.<sup>m</sup> -

It tells me how I could  
thank them. Their generous  
loyalty takes my breath  
away but - please remember  
it is my <sup>is</sup> Glos:  
that - this is the - and the concern

W. Hurdle's wonderful trip.  
& the meeting of appreciative  
parents were all delighted & thank-

My original fond hope is  
being fulfilled - that our  
country would fair the world.  
We have had applications  
from half a dozen country  
Councils in the last week  
or so - for information in  
the first place. We shall do  
what will follow.

You wondered whether  
you should speak or read.  
Let us have as much  
speaking as possible with  
reference to notes if you think

i3p152 cmc 310

Well - the whole thing will  
be very informal. It is just  
to show people what we  
are at, or gloss would be  
a hundred times better!

I hope several glosses  
will come. They are compon-  
-tively rich in material so  
would not mind the  
cost. How low we could  
not run up.

You will allow us to pub-  
-ly up her of course - in  
such a fraction of a visit!  
I am sending a small  
batch of letters instead of more  
with kindest regards,

I am very sorry you have  
to leave us so old & dear  
friends Mrs. Avery,  
when I have heard  
from Mr. & Mrs. Household.  
It is delightful  
to have a prospect of seeing  
you again hearing you.  
Did Lord Parry  
visit Pennethorne  
when I sent an account  
of the meeting at Bromley?  
How stupid of me.  
I send more screeds  
about - Mr. Hurdle, the Wincob-

him? If so, perhaps  
you would see him some

Sorrow (to me as I have) you know just the importance! I enclose a note from Mr. Costley which shows that your coming is of importance. Alas, the time he can give us is miserably short in  $\sqrt{2}$ , Remon, + IV on the classical + on the modern sides - I am so very glad that you will have a word with the Masters.

I think do good work.  
I am wondering when  
you going to our Conference  
+ to Westminster.

It seems to me they  
will not be able to read more  
than six or seven books in  
the limited time. The point  
I am anxious about is  
that they should read  
our books at our pace.

they should take our questions  
in these books.

I can see that in a  
school which has its own book  
& its own methods a change  
must be tiresome but  
I hope the H. R. will have  
the necessary comity  
& that you will win in
